Professional Summary

Software Engineer with experience building Python-based automation, backend workflows, data validation systems, APIs, and AI/ML-powered applications across enterprise and academic projects. Strong foundation in Python, C++, SQL, Linux, software testing, and data processing, with hands-on experience developing LLM applications, machine-learning solutions, and AI-enabled automation workflows. Experienced in translating technical requirements into reliable solutions, debugging complex workflows, and collaborating with global cross-functional teams. Interested in software engineering roles spanning backend systems, automation, platform engineering, data-intensive applications, and AI/ML-enabled products.

Technical Skills

- **Languages:** Python, C++, SQL, JavaScript, TypeScript **Software Engineering:** Data Structures & Algorithms, OOP, REST APIs, Backend Development, Debugging, System Design Fundamentals
- **Automation & Systems:** Python Automation, Test Automation, System Validation, Test Case Design, Data Validation, API Testing, Data Parsing, Defect Tracking, Test Reporting, BDD (behave)
- **AI / ML:** Machine Learning, Deep Learning, Neural Networks, LLM Applications, Generative AI, LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering, AI-Driven Process Automation, Model Evaluation
- **Frameworks & Tools:** Pandas, NumPy, Scikit-learn, Matplotlib, React, Node.js, Tornado, Linux, Git, GitHub, Jupyter, PyCharm, VS Code, CI/CD Fundamentals
- **Enterprise & Analytics:** SAP CRM, SAP SPC, SAP CRT, Tableau, Power BI, SAP Analytics, QlikSense, Advanced Excel

Work Experience

SAP Analyst | Deloitte **Jan 2025 – Present**

- Designed and developed Python-based automation pipelines for enterprise process automation, data extraction, processing, validation, and reporting across SAP systems.
- Built AI-enabled automation workflows integrating LLM-based components with data-processing and validation stages to improve process efficiency, accuracy, and decision support.
- Developed automated validation workflows and quality checks to identify data inconsistencies, processing exceptions, and defects before release.
- Designed and executed test cases for Python automation tools, validating functional behavior, data accuracy, edge cases, and release readiness.
- Built dashboards and reporting systems providing visibility into process health, validation results, defects, and remediation progress for stakeholders.
- Collaborated with global business, technology, compliance, and cross-functional teams to translate requirements into technical workflows, test specifications, and deliverable solutions.

SAP Intern | Deloitte **Jul 2024 – Jan 2025**

- Developed a Python-based automated reporting and validation module integrating SAP CRM, SPC, and CRT data, reducing manual reporting effort by **75%**.
- Automated data validation workflows using Python to identify inconsistencies and defects, reducing reporting errors by **30%**.
- Built standardized dashboards and automated reports supporting operational monitoring, quality tracking, and decision-making.
- Collaborated with business and technology teams to gather requirements, define test specifications, troubleshoot issues, and validate delivered solutions.

Projects

BuildYourPassword **Jan 2024 – Mar 2024**

- Developed a Python-based password strength analysis system combining rule-based validation, breach detection, and machine-learning models including Decision Tree, Logistic Regression, Naive Bayes, and Neural Network approaches; designed test cases covering functional behavior, edge cases, and model outputs.

LabGenie **Aug 2023 – Dec 2023**

- Developed an LLM-powered application using Python to analyze and explain structured health-report data, achieving **96% prediction accuracy**; designed test scenarios to evaluate output correctness, consistency, and interpretability across diverse inputs.

Education

Kalinga Institute of Industrial Technology, Bhubaneswar **Oct 2020 – Jul 2024**
Bachelor of Technology in Computer Science and Engineering GPA: **8.68**

Additional

Publication: IEEE Publication (2023) – Comparative Analysis of Breast Cancer Diagnosis using Smart IoT-based Approach

Certifications: Neural Networks and Deep Learning (Coursera); Introduction to Networks & Cybersecurity Essentials (Cisco Networking Academy)
